INDICATIONS: As an aid in the treatment of milk fever and other calcium, glucose, magnesium and phosphorus deficiencies in adult cattle, sheep, horses, and swine.

Product Monograph Information

DOSAGE AND ADMINISTRATION: For intravenous, subcutaneous, or intraperitoneal administration in cattle, sheep, and swine and strictly intravenously in horses. Warm the solution to body temperature prior to use. When administered subcutaneously, the dose should be divided over several sites. Inject slowly and use aseptic technique for administration. Massage to facilitate absorption.

Adult Cattle and Horses	250-500 mL
Adult Sheep and Swine	50-125 mL

Repeat in several hours if required or as recommended by a veterinarian. If there is no noticeable improvement after 24 to 36 hours or less depending on the severity of the condition being treated, consult your veterinarian. Monitor animal's condition closely.

CAUTIONS: Contains no preservatives. Use only if solution is clear. Discard any unused portion.

STORAGE: Store between 15 and 30°C. Keep from freezing. Keep away from direct light.
