CALCIUM BOROGLUCONATE 23% INJECTION

Calcium Borogluconate Injection

Veterinary Use Only

Sterile Injection

DIN 02475502

WARNINGS: No withdrawal period for meat and withholding time for milk are required when used according to the label. Keep out of reach of children.

ACTIVE INGREDIENTS:

Calcium gluconate monohydrate (equivalent to 10.71 g of calcium per 500 mL) - 23.963% w/v

INACTIVE INGREDIENTS: Boric acid, water for injection.

INDICATIONS: As a source of calcium for cattle, sheep and swine, to aid in the treatment of hypocalcemia, e.g., milk fever in the dairy cow.

DOSAGE AND ADMINISTRATION: Administer slowly by intravenous or subcutaneous injection. Intravenous administration is recommended for the treatment of acute conditions. When administered subcutaneously, the dose should be divided over several sites. Warm the solution to body temperature prior to use. Use aseptic technique for administration. Dosage may be repeated after several hours if required or as recommended by a veterinarian.

Adult Cattle	250-500 mL
Adult Sheep and Swine	50-125 mL

or as recommended by a veterinarian.

CAUTIONS: Use only if solution is clear. If no improvement is noticed in the condition being treated after 24 hours or less depending on the severity of the condition, the diagnosis should be re-evaluated and a veterinarian consulted. Do not retain partially used vial. Contains no preservative.

STORAGE: Store between 15 and 30°C. Keep from freezing.

PRESENTATION: 500 mL
